2 Description

The Debian Description Translation Project aims to provide translated package descriptions.

The project supports:

- Fetching of current and older package descriptions.
- Adding of new translations via an email interface.
- Reusing of already translated paragraphs from one description in other package descriptions.
- Providing of Translation-* files for mirrors and APT.

Debian is one of the most important project of Open Source Software. PerLegere should help increasing the spread of it.

3 Administration

- project manager: Thorsten Alteholz <thorsten.alteholz@perlegere.org>
